

Information Security Policy

NIST Global Private Limited is committed to preserve the confidentiality, integrity and availability of all its physical and electronic information systems and records.

To ensure effective management of information risk, the organization will:

- Align its practices with the overall purpose
- Establish information security objectives or provide a framework for developing them
- Commit to meeting applicable information security requirements
- Emphasize on the continual improvement of its information security management system

Information and information security requirements will continue to be aligned with business objectives and targets and the Information Security Management System (ISMS) is intended to be an enabling mechanism for information sharing, for electronic operations, remote and distributed working, and for reducing information-related risks to acceptable levels.

In particular, it is the Policy of NIST Global Private Limited to ensure that:

- Information will be protected against unauthorized access
- Confidentiality of information will be assured
- Integrity of information will be maintained
- Any breach of Information Security, actual or suspected, will be investigated and corrective actions will be taken.

All employees, freelancers, contractors and other non-employees granted access as users of NIST Global Private Limited information systems are expected to comply with this policy and with the ISMS that implements this policy as appropriate to their work roles.
